

2.0-litre Ford Zetec Engine ECU Fault Investigation Process

Version 1.01 (Published) – 11th February 2026

**Document compiled for
BriSCA F2 / SSCA by:**

**Adrian Blackwell
(BriSCA F2 Chief Technical Consultant)**

Autospeed, BriSCA F2 and the SSCA are pleased to advise that there is an agreed process for the investigation and potential repair of BOTH the older OMEX ECUs as well as the newer NoDiz models as used in BriSCA F2 Stock Cars and National Saloon Stock Cars with the 2.0-litre Ford Zetec engine.

OMEX ECUs

- OMEX ECUs were originally supplied with a 12-month warranty, which is clearly well past now, given that the former incarnation of the company was one of many that had issues during the Covid pandemic forcing BriSCA F2 / SSCA to change suppliers.
- Some ECUs will now be over 10 years old given the Zetec engine was introduced to the formulas in 2015.
- BriSCA F2 / SSCA are working with the current OMEX company to now offer an investigation and repair service (where physically/economically viable) for OMEX ECUs.
- A non-refundable investigation fee of £125 (inc. VAT) is payable up-front, for which OMEX will open up an ECU, test its functionality, and advise on whether it is repairable or beyond repair (giving a repair quote where applicable).

NoDiz ECUs

- The current supplied NoDiz ECU comes with a 12-month warranty as standard.
- There is no up-front fee for ECUs sent for repair within the initial 12-month warranty period.
- After this time, any faulty ECU may be repairable for which there may be a charge, depending on the fault.
- A non-refundable investigation fee of £20 (inc. VAT) is payable up-front for NoDiz ECUs sent for investigation/repair outside of the 12-month warranty period.
- NoDiz will open up an ECU, test its functionality, and advise on whether it is repairable or beyond economic repair (giving a repair quote where applicable).

Investigation/Repair Process

- In the first instance, any owner with a suspected faulty ECU should contact Autospeed, quoting the ECU's serial number:
 - OMEX ECU serial numbers are located on the end of the unit, next to the Serial interface
 - NoDiz ECU serial numbers are located on a barcode label on the top face of the unit
- Autospeed will confirm whether the ECU is within the 12-month warranty period (NoDiz only), or if a fee is payable.

- The owner must make the appropriate fee payment to Autospeed (see details below) BEFORE the ECU is dispatched for investigation.
- On payment of the appropriate non-refundable fee (where applicable) Autospeed will advise the owner where to send the ECU (either to Autospeed, or directly to the appropriate supplier).
- Once the ECU has been inspected, the owner will be advised of the outcome and any additional cost to repair (if applicable).
- It is the owner's choice whether to proceed with any repair (and therefore pay any additional repair costs), or invest in a new ECU with a fresh warranty.

Autospeed Contact Details

To contact Autospeed to arrange an inspection/repair and advise of a serial number, use either of the following methods...

- Office Phone 01934 631500
- Email office@autospeed.co.uk

Autospeed Payment Details

Fees can be paid via either of the following methods...

- PayPal shop@autospeed.co.uk
- BACS Transfer Account Name: Autospeed
 Sort Code: 30-99-51
 Account No.: 02537835

- Ends -
